

COMPLIANT SUSTAINABILITY

& ITAD COMMAND

- SOVEREIGN LOGISTICS
- CERTIFIED ERASURE
- OWNED MATERIAL RECOVERY

CRITICAL FAILURES

CURRENT DISPOSITION DEFICIENCIES

DATA EXFILTRATION

Unmanaged hardware disposal is a primary vector for data breaches. Incomplete sanitization invites catastrophic liability.

OPAQUE VALUE CHAIN

Assets leaking into the informal sector bypass oversight. Zero chain-of-custody means zero accountability.

REGULATORY EXPOSURE

Non-compliance with CPCB and DPDP regulations results in escalating financial penalties and reputational damage.

CIRCULAR DEAD-ENDS

Shredding functional hardware is not sustainability; it is waste. Standard recyclers ignore the value in reuse.

DEEP MATERIAL RECOVERY

EFFICIENCY MULTIPLIER

Unified ITAD reduces vendor sprawl. One partner for logistics, data security, and recycling ensures a closed loop with no leaks.

SANITIZATION PROTOCOL

DATA NEUTRALIZATION

Our sanitization methods exceed standard enterprise requirements, providing a forensic-grade guarantee that legacy data cannot be recovered.

SOVEREIGN INFRASTRUCTURE

MALKAPUR UNIT

Our primary recovery facility in Malkapur, Buldhana (Maharashtra) is fully authorized for deep material extraction. We own the capacity, ensuring no outsourced risk.
